

# CONNECT STORAGE

The Connect Storage units are available in three heights and are made out of American white oak veneer, with oak edge tape on the front edge and finished with a matte clear lacquer. There are multiple configuration options available as each box can be rotated 45 degrees in any direction. The boxes are locked in position on top of each other by four custom made black plastic spacers. The spacers are located into four holes drilled into the top and eight holes drilled into the bottom of each unit. Each unit will come with these spacers provided. The name is in reference to the way each unit is connected but not attached to the one below it.

## CARE INSTRUCTIONS

Clean regularly with a damp, clean soft cloth and warm soapy water – dry immediately. If there are any liquid spills wipe dry quickly to avoid permanent mark. General care: we do not recommend placing your furniture in direct sunlight or near sources of heat. This is due to the natural characteristics of wood as it expands and contracts with changes in humidity. Placing your furniture in these environments may cause the timber to dry out, shrink and crack. Avoid leaving water sitting on wood as this can cause permanent marks - wipe immediately with a dry cloth. Do not place hot or sharp objects on the surface of the wood as this can damage the surface of the wood. Avoid contact with harsh solvents such as nail polish remover / alcohol.

## LARGE

40 x 40 x 146cmh
