

# HEM SOFA COLLECTION

Designed by David Moreland, product designer at Citta Design. The Hem collection includes a two seater and a three seater sofa, an armchair and an ottoman. The ottoman can either be used on its own, or placed against the sofa to create a chaise. Designed to have a comfortable look and feel featuring L shaped stitching detail, each piece is made with a steel base and solid pine frame covered in multi density foam. Upholstered in either wool blend or polyester tweed, each fabric available in two colours.

Locally made in Auckland, New Zealand by a manufacturer with 25 years of industry experience in both commercial and residential furniture.

## CARE INSTRUCTIONS

Always protect fabric from direct sunlight. Apply only water-based fabric protector treatments. Vacuum weekly using low suction. Rotate reversible cushions regularly. Pilling can occur as a result of normal daily wear and should not be considered a fault. Fibre pills can be removed by a battery operated pill shaver. Any pilling will diminish and eventually cease once excess fibres have been removed. Treat spills and stains as soon as possible. Gently scrape any soil or mop any liquid from the surface of the fabric. Apply proprietary cleaning agents strictly according to instructions to remove the residue of the spill.

## CLEANING

Do not remove cushion covers for separate cleaning or washing, even though they may have zippers.

Shampoo clean using upholstery shampoo. Do not use dishwashing or laundry detergents. Do not wet filling. Do not scrub with a stiff brush. Dry in shade away from direct heat. Allow to dry thoroughly before re-use.

Annual professional cleaning recommended with either a hot-water extraction machine or dry cleaning machine.

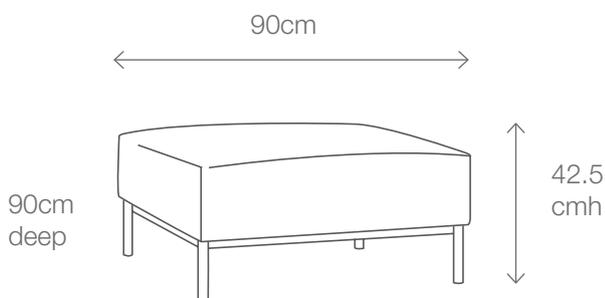

Asphalt: 85% wool, 15% nylon, 60,000 Martindale rub test

Oyster: 78% wool, 11% silk, 11% nylon, 100,000 Martindale rub test

Concrete: 100% polyester, 100,000 Martindale rub test

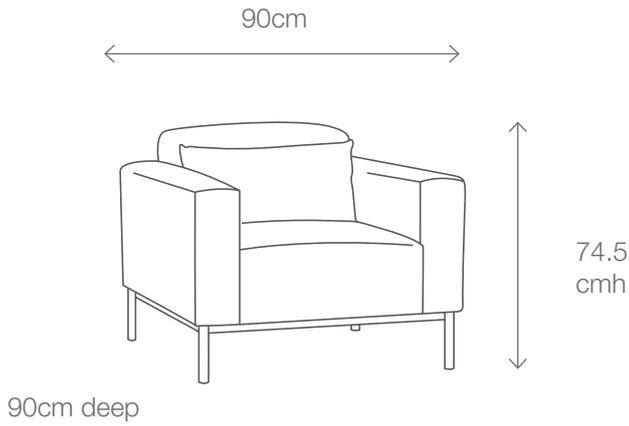

Smoke: 100% polyester, 100,000 Martindale rub test

The industry standard for a domestic sofa is 20,000 rubs. 80,000 - 100,000 rubs is considered high result, making these fabrics suitable for both domestic and commercial use.
