# OUR ROOFING EXPERTISE

At Monier, we are very clear about why we serve the homeowners of Australia. We are here to help protect the people you love. Having supplied roofing products for more than 100 years, we have protected thousands of families from the harsh Australian climate. It's something we take very seriously.

The enduring success of Monier is underpinned by our commitment to quality Australian-made roofing products, superior customer service and continued innovation. Monier nurtures the entire process, from manufacturing our tiles in Australia right through to installation onsite. This is how we can ensure you are getting the best quality products and service.

However, it's not all about protection: it's about beauty too and first impressions count when it comes to the look of your home. At Monier, we continue to innovate, because we know that design trends change and technology continues to improve the performance of your roof. Because of this, Monier have launched Australia's first integrated modular flat solar tile system (SOLARtile). We have also delivered new coating technologies for concrete tiles that far surpass competitors by way of longevity and introduced the Elemental™ Composite Lightweight roofing system.

We are all about creating strong and beautiful roofs that will protect the people you love.

# SELECTING A MONIER ROOF

-  BETTER COLOUR PERFORMANCE\*
-  NO RUST OR CORROSION
-  SALT SAFE
-  THERMAL INSULATION
-  ACOUSTIC INSULATION

Ensuring you pick the right roof can make or break the look of your home. With the roof making up to 30% of the façade of your home, it's no wonder making the right choice is important. First impressions definitely count in increasing the value of your home.

So whether it is a look you want to achieve, the best possible material or building within a budget, we have put together a simple guide to help pick the right roof for you.

**After all, at Monier it is about being Strong & Beautiful!**

# SELECT BY TILE MATERIAL

## TERRACOTTA

-  COLOUR THAT LASTS A LIFETIME
-  NEVER RUSTS OR CORRODES
-  ENDURING BEAUTY

When it comes to performance and colour, nothing is longer lasting than Terracotta. Monier Terracotta roof tiles are made from natural Australian clay and fired at a temperature of over 1000°C, baking the colour right into the tile, enabling it to withstand Australia's harshest weather elements and the test of time. That's why we offer a 50yr guarantee on both colour and performance.

**SEE PAGE 16**

## CONCRETE

-  BETTER COLOUR PERFORMANCE
-  STRENGTHENS WITH AGE
-  NEVER RUSTS OR CORRODES

Concrete tiles are the most economical roofing material on the market. Just like concrete bridges and structural elements of buildings, concrete tiles get stronger with age. Concrete tiles are tested to withstand the harsh Australian weather and come in the widest selection of colours and profiles. Our C-LOC™ Colour Technology allows our tile to retain its gloss 8 x better than COLORBOND® Steel.

**SEE PAGE 20**

## ELEMENTAL™

-  STREAMLINED LOW PITCH
-  STRONG & LIGHTWEIGHT
-  CREATED FOR ALL THE ELEMENTS

Elemental™ Series is a contemporary, innovative and distinctive range of lightweight roofing products designed to inspire architects, designers and home builders. Developed from a technology used within the aerospace industry, it is extremely strong yet lightweight. It comes in a range of styles, from the classic slate through to the large Ultra panel to create a more contemporary look.

**SEE PAGE 28**

## SOLARTILE

-  INTEGRATED DESIGN
-  STRUCTURAL INTEGRITY
-  THE POWER OF A GREAT LOOKING ROOF

Monier SOLARtile integrates seamlessly into our flat profile range of concrete tiles, minimising the visual impact that many bolt-on systems create on your roof. Monier innovation within this area allows you to have a great looking roof along with the benefits solar energy offers.

**SEE PAGE 32**

# SELECT BY LOOK

---

Monier's versatile product range allows for many different architectural styles to be accommodated. From the classic Hamptons look so on-trend now to a modern industrial style, there is a Monier material, profile and colour to suit your dream home. Speak to a roofing expert at Monier today to find out more about how to match your roof to your style.

## HAMPTONS

There's a certain coastal feeling about the Hamptons, which is after all, a beachside holiday destination. Distressed white trims, understated grey tiles and sun bleached colours form the cornerstone of the style. Monier Colour-Through Cambridge or Madison tiles are an ideal match for the sophisticated look that is created by a Hampton-style home.

TERRACOTTA - MARSEILLE  
AURORA  
SEE PAGE 17

## HERITAGE

Heritage homes line the streets of our major cities and fill our suburbs with charm. Often adorned with Monier terracotta tiles, heritage homes endure the test of time with the combination of long-lasting brick and terracotta roof tiles. To achieve the heritage look it's hard to look past the profiled terracotta Marseille tile with traditional lapped ridges.

**TERRACOTTA - NULLARBOR**  
RIVERSTONE  
**SEE PAGE 19**

### INDUSTRIAL

The industrial style celebrates raw materials with a stripped back, minimalist feel. This look has made its way to the mainstream with exposed brick walls, industrial-style staircases and features, now a regular feature of Australian renovations. Our Elemental™ Ultra and square panels are the ultimate roofing material to complete an industrial look with a streamline edge and plenty of sleek finishing options. Our flat concrete or Terracotta tiles will also suit an industrial look.

## CONTEMPORARY

Contemporary homes often get strong reactions, but whether you like the look or not, they make a statement. Contemporary homes feature composite facades with mixtures of brick, timber, render or composite materials. Monier flat profiled tiles such as Terracotta Nullarbor or Concrete Horizon create a streamline flat look that works hand in hand with contemporary designs.

**SEE PAGE 19**

# COLOUR PERFORMANCE BY RANGE

---

The benefits of Monier's roofing products are their longevity and flexibility. Here is an overview of our colour performance and technology by range.

## TERRACOTTA

Terracotta has colour baked in for life. Years down the track your Monier terracotta roof will look as good as the day it went on - with a quick pressure clean.

For colour performance, nothing surpasses Terracotta. Made in Australia, it comes with a 50 year performance and colour guarantee.

## CONCRETE

Monier concrete roof tiles come in the widest range of colours and profiles and while concrete tiles weather over time, it is easy to update with a simple re-coat. With Monier's continual commitment to innovation, we offer the latest technology in colour and coating, to ensure you have the best looking roof in the street!

**COLOUR THROUGH TECHNOLOGY** is a technology mixed in with the concrete so the colour goes right through the tile, which helps maintain the look of your roof over time. Our Colour-Through tiles are also coated with C-LOC™ for extra colour and gloss longevity. Colour-Through and C-LOC™ are available on our Madison, Cambridge & Georgian tiles.

**CAT COLOUR** CAT Colour technology is a water based coating created to ensure a deeper, richer and more consistent colour. While concrete tiles may weather over time, our independent testing has shown that this provides 78% better gloss retention than COLORBOND® Steel. CAT Colour is available on our Elabana and Tudor Concrete Tile Range.

**C-LOC™** Colour Lock Technology is our latest generation in coating. Exclusive to Monier, it retains gloss for even longer than CAT Colour, so your roof is more resistant to fade. Monier C-LOC™ Technology has been independently tested to have 8 X better gloss performance than standard COLORBOND® Steel. C-LOC™ is available on our Atura, Horizon and Colour Through Concrete range

## PRODUCT TESTING

Independent testing has shown that after 2,000 hours of accelerated weathering\*, standard COLORBOND® steel loses 98% of its gloss and shows a significant change in visual appearance, whereas C-LOC™ loses only 12% with no visible change in appearance. With 8 times more gloss retention, Monier's technology outperforms other concrete tile and metal roofing competitors.

PRODUCT	LOSS OF GLOSS
Monier terracotta tiles	0% - loss
Monier concrete with C-LOC™ coating	 12% - loss
Monier concrete with CAT colour coating	 55% - loss
Competitor concrete tile with solvent-based coating	 83% - loss
COLORBOND® steel	 98% - loss

\* Product samples are independently tested in a NATA certified lab for 2,000 hours with cycles of UV exposure and condensation to simulate natural weather exposure. Testing has been performed on product samples of similar colour for fair comparison

# 7 REASONS WHY YOU SHOULD CHOOSE TILES

---

The roof generally makes up 30% of the surface of your home. First impressions definitely count and can add significant value to your home – so it's important to get it right.

## 1 TILES CAN CREATE THE RIGHT LOOK FOR YOUR HOME

Tiles come in a wide range of colours and profiles, so you can tailor the look you are after. So, whatever your style, whether it is the classic Hamptons, a more modern streamlined look, tiles can blend in seamlessly with the exterior design.

## 2 TILES ARE BEST SUITED FOR AUSTRALIAN CONDITIONS

Our harsh weather and extreme climate changes can be tough on roofing materials, particularly along Australia's coastline. Unlike metal, tiles don't rust or corrode and terracotta tiles won't fade over time. It's important to note that if you buy a standard COLORBOND® steel or ZINCALUME roof your warranty may be limited if you live within 5km of salt water.

## 3 COLOUR LASTS LONGER ON TILES

Unlike metal roofs, Terracotta colour is forever, thanks to its manufacturing process, in which the colour is baked in at extremely high heats so the colour never fades.

While concrete tiles can fade gradually over time, Monier concrete tiles tested in lab conditions simulating natural weather exposure shows better colour performance than standard COLORBOND® Steel.<sup>1</sup> Additionally, Monier concrete tiles offer a choice of colour technologies to retain the look, beauty and re-sale value of your home (see page 12).

## 4 TILES ARE RESILIENT

Concrete tiles like other concrete products actually get stronger with age. Given their strength, tiles will not crack if you walk on them in the correct place. In the unlikely case of cracked tiles, you only need to replace individual tiles versus a whole sheet of damaged metal.

## 5 TILES ARE RESISTANT TO HIGH WINDS

The durability and strength of tiles means they may perform better than sheet metal in extreme wind conditions as wind uplift forces are significantly lower in tiled roofs.<sup>2</sup>

## 6 MONIER TILES COME WITH WARRANTIES THAT YOU CAN TRUST

Monier terracotta roof tiles come with a 50-year performance and colour guarantee; while concrete roof tiles come with a 50-year performance guarantee. COLORBOND® Steel offers up to 36 years warranty on standard steel, which may be affected if your roof:

- rusts where sheets overlap
- corrodes due to contact with sunscreen
- corrodes due to contact with soil
- lives within 5km of the ocean

## 7 TILES CAN BE USED ON LOW-PITCHED ROOFS

Monier's roofing solutions are suitable for lower-pitched roofs. Concrete tiles can reach a pitch of 15 degrees with sarking, Terracotta Nouveau can reach 12 degrees with sarking, and Elemental™ can handle even flatter pitches of 10 degrees.

# SELECTING THE FINISH OF YOUR ROOF

At Monier we know how important getting the right look for your home is, that's why we offer lapped and A-line ridging options available for both concrete and terracotta tiles.

## A-LINE RIDGING — FOR THAT CONTEMPORARY LOOK

When completing a project, the finish of a product can make all the difference. It's the same for roofing. Therefore, if it is a more contemporary, minimalist look you are trying to create, consider A-Line Ridging. For a more traditional look a lapped ridge works really well with our profiled tiles.

## ELEMENTAL™ MITRED FINISH

Our new Elemental™ Series offers Mitred Ridging, so you can create an even more streamlined look. Please speak to the Monier team about mitred ridging.

## THE ELEMENTAL™ SERIES OFFERS THE BEST IN PERFORMANCE, STRENGTH AND DISTINCTION

---

The Monier Elemental™ Series is a contemporary, innovative and distinctive range of lightweight roofing products designed to withstand ALL the elements.

We've re-imagined roofing to inspire the creativity of Australia's architects, designers, builders and families. Elemental™ celebrates Monier's commitment to strength and beauty, combining modern materials and cutting-edge technology to achieve streamlined lightweight roofing.

The Elemental™ Series offers a refined selection of sizes and colours. Whether it's the contemporary large Ultra Panel or unique Square Panel designed to complement contemporary low-pitch roofs, or the modern interpretation of classic shingle and slate, this range offers all the possibilities to re-imagine roofing.

ELEMENTAL™ SHINGLE  
MIDNIGHT

## PRODUCT BENEFITS

The material is manufactured from an advanced fibre-reinforced engineered composite developed for the aerospace and automotive industries. Tested by CSIRO to Australian Building Standards (AS4046), the Monier Elemental™ Series is UV-resistant and boasts unprecedented strength.

### DESIGN FLEXIBILITY

Large Ultra Panels 1500 x 750mm or Unique Square Panels 750mm x 750mm

Unique aesthetic appeal with an exfoliated stone or slate finish

Perfect for both modern and classic low pitch roofs as low as 10°

Slim 12mm thickness to capture clean lines

### STRONG & LIGHTWEIGHT

Australian innovation backed by a 30 year structural guarantee

5 x lighter than tiles

Ideal for large structural components

Independently tested and certified by CSIRO to Australian Building Standards (AS4046)

Composite materials have a high strength to weight ratio

### CREATED FOR ALL ELEMENTS

Manufactured to last against harsh Australian conditions

Unlike metal, this lightweight composite material won't rust in coastal environments, will not fade as fast in the hot sun, and will not dent as easily in a hailstorm

A built-in long lasting UV colour fast coating system to guarantee colour integrity

Tested for high-heat applications up to BAL40\*

### QUICK & EASY TO INSTALL

Innovative clip fix system for quick installation

Lightweight and easy to handle

Simple components and construction techniques to ensure fast and easy installation

## COLOUR RANGE

Monier has carefully developed a range of colours to suit the Elemental™ Series. With the exception of Midnight (slate grey), all our colours are made-to-order (MTO) and may be subject to minimum orders and lead times.

**Contact Monier on 1800 666 437 for made-to-order and customised colour requests.**

# MONIER SOLARTILE

-  INTEGRATED DESIGN
-  STRUCTURAL INTEGRITY
-  THE POWER OF A GREAT LOOKING ROOF

**SOLARTILE - CONCRETE**  
CAMBRIDGE - SOHO NIGHT

# SOLARTILES UNIQUE INTEGRATED DESIGN MEANS YOU'LL NEVER NEED TO COMPROMISE THE VISUAL APPEARANCE OF YOUR HOME.

Unlike regular bolt-on PV panels, Monier SOLARtiles can be laid in any configuration to blend seamlessly into your homes roofline.

## MODULAR SYSTEM

Being a tile based modular system, it is able to capitalise on smaller sections of your roof to optimize the energy production.

## STRUCTURAL INTEGRITY

Unlike traditional bolt-on systems, the impact on the natural wind flow around the roof is minimized hence wind pressures and debris build-up around the system is reduced. Also, there is no need to cut, grind or drill through your existing roof during installation.

## INSTALLED SOLUTION

Monier has the knowledge to professionally install your SOLARtiles from delivery to final connection. We can even manage the STC rebate, so you can get on with more important things.

## BATTERY

A Solar battery lets you maximise the benefit of your SOLARtile installation by capturing excess power and using this power to run your home when the sun goes down. Adding a battery to a SOLARtile system gives you greater independence by making you less reliant on the grid.

THE MONIER SOLARTILE HAS BEEN DESIGNED TO INTEGRATE WITH:

# ACCESSORIES & INSTALLATION

 MORE COMFORTABLE

 ENERGY EFFICIENT

 HEALTHIER

## INTRODUCING SARKING & VENTILATION SYSTEMS FOR YOUR HIGH PERFORMANCE TILED ROOFS

The right sarking and ventilation system can make your home more comfortable, improve energy efficiency and control condensation. To optimise the performance of your new Monier™ tiled roof, consider installing Bradford™ roof sarking and Edmonds® ventilation products. A system of reflective roof sarking combined

with hybrid or wind-driven ventilation can help a tiled roof keep your home cooler throughout summer. Ventilation also helps reduce the risk of harmful condensation all year round by regularly replacing the air in your roof cavity.

### EVERY BEAUTIFUL ROOF DESERVES A SECOND SKIN™

Thermoseal™ roof sarking sits under your roof tiles like a protective second skin™, improving the comfort of your home while protecting the ones you love.

## CONTINUOUS COMFORT IN A FRESHER, HEALTHIER HOME

Edmonds® ventilation encourages fresh air into your home and creates a more comfortable, healthier living environment for your family.

### HEAT REDUCTION

In summer, your roof space can reach temperatures of up to 70°C. Put simply, a roof ventilator removes the heat and replaces it with cooler ambient air. This helps your insulation work more effectively and reduces the need to run your air conditioner to keep your home comfortable.

### MOISTURE MANAGEMENT

Moisture in your home can be a destructive force which causes condensation. This in turn can result in structural damage. Moisture also leads to mould and mildew that can trigger asthma and allergies. With this in mind, proper ventilation not only helps protect the integrity of your home but can also improve the health of your family.

### AIR QUALITY

There's nothing like a breath of fresh air, but many homes aren't designed to encourage air circulation. Edmonds® roof and sub floor vents, ceiling grilles, and air transfer systems help to encourage fresh air into areas of your home where it's most beneficial.

## HOW TO CHOOSE THE RIGHT SYSTEM FOR HOMES WITH TILED ROOFS

To select the right ventilator for your application, simply select the Edmonds® product that corresponds to your needs.

### EDMONDS LOW ENERGY VENTILATION

#### AiroMatic®

Equivalent to 6 wind driven vents

Allows natural light into the roof space

#### Maestro BAL™

Ideal for homes in bush fire areas

Rated to BAL 40 (AS3959-2009)

### EDMONDS WIND DRIVEN VENTILATION

#### WindMaster™

High quality aluminium

Runs energy free

#### TurboBeam™

Clear acrylic headlets in natural light

Deters pests from entering roof space

#### SupaVent™

UV stable polymer

Suitable for coastal areas

Low profile design

## ROOF RESTORATION & MAINTENANCE RANGE

Monier's Roof Restoration and maintenance range has been designed by the roofing experts to perform in Australian conditions.

The range is designed for use on all types of concrete and terracotta roofs\*. Importantly, the entire product range meets all relevant Australian standards so you're assured of product quality and durability.

Working at heights has risks and Monier recommends all work should be carried out by a qualified roofing specialist.

For more information on the Monier roof restoration and maintenance range please refer to our website at: [www.monier.com.au](http://www.monier.com.au)

\*Monier does not recommend the use of Roofcoat™ on Terracotta roof tile.

# AWARDS

The enduring success of Monier is underpinned by our commitment to quality Australian made roofing products, superior customer service and continued innovation.

# DIGITAL

WE WANT YOU TO BE  
INSPIRED BY YOUR ROOF  
AS MUCH AS WE ARE.  
THEREFORE, WE HAVE  
ALL THE INFORMATION  
YOU NEED AT YOUR  
FINGERTIPS.

At [monier.com.au](http://monier.com.au), you can read up on all the latest product information, view our latest projects and even design your ideal roof using our “Build your Roof” tool.

If you're looking for a Monier certified Roofing Specialist, you can find one near you by using our specialist locator and if you would like to see a roof up close, visit a display or selection centre near you.

We're always interested in hearing how your project went so look us up on Facebook or Instagram (@csrmonier) and share your project with us.

## WARRANTY INFORMATION

For warranty information on any Monier product please refer to our website. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

# MONIER™

## PROTECTING THE PEOPLE WE LOVE FOR OVER 100 YEARS

We are exceptionally proud of our successful 100-year history protecting Australians from the often harsh Australian elements. While this credible test of time supports our claim as Australia's leading roof manufacturer, we undoubtedly owe our enduring success to a commitment to quality and continued innovation. From the original Wunderlich Terracotta tile to the world's first integrated SolarTile, and now the new lightweight composite Elemental™ Series, our core values have remained.

There's strength and beauty in protecting the ones we love.

**Contact Monier on 1800 666 437 to find out more.**
