Sikafloor® MultiFlex PB-32 UV

TOUGH-ELASTIC UV STABLE POLYURETHANE FLOORING / DECK SYSTEM

DESCRIPTION
Sikafloor® MultiFlex PB-32 UV is a multipurpose, tough-elastic and slip resistant polyurethane flooring system and is part of the Sikafloor® Multiflex flooring range. Sikafloor® MultiFlex PB-32 UV is especially designed for use in many different industrial applications where seamless, UV and color stable, hardwearing floors are required and makes use of Sika’s unique i-Cure technology to improve surface aesthetics and reduce sensitivity for ambient humidity during application. Sikafloor® MultiFlex PB-32 UV consists of a tough-elastic, crack bridging polyurethane base coat over which a UV resistant top coat to fulfils as well the stringent demands for low VOC emitting products.

USES
Sikafloor® MultiFlex PB-32 UV suitably experienced and trained specialist contractors.  
- Car Park Decks and Ramps
- Life Science industry
- Automotive industry
- Industrial flooring for Storage, Logistic centers

CHARACTERISTICS / ADVANTAGES
- High mechanical resistance
- Good chemical resistance
- Good UV resistance
- Scratch resistant surface
- Low dirt pick up
- Easy to clean and maintain
- Seamless
- Anti-slip surface
- Low VOC content

APPROVALS / CERTIFICATES
- Synthetic resin screed material according to EN13813:2002, Declaration of Performance and provided with the CE marking
- Coating for surface protection of concrete according to EN 1504-2:2004, Declaration of Performance and provided with the CE marking
- Fire classification reports No. 20150909/01 MPA Dresden
System Structure

**Sikafloor® MultiFlex PB-32 UV**

<table>

<td>Sikafloor®-359 N</td>
<td>~Total 0.7–0.9 kg/m²</td>
</tr>
</tbody>
</table>

Consumptions are theoretical and do not include any wastage or additional materials needed due to porosity, substrate profile etc.

**Composition**
Polyurethane

**Appearance**
Slip resistant, matt finish

**Colour**
Almost unlimited choice of colour shades.

**Nominal Thickness**
~3 mm

Dew Point

Beware of condensation! The substrate and uncured floor must be at least 3 °C above dew point to reduce the risk of condensation or other disturbance of the surface on the floor finish.

Substrate Temperature

+10 °C min. / +30 °C max.

Substrate Moisture Content

Sikafloor® MultiFlex PB-32 UV can be installed on substrates with moisture content of max. 4 % (checked by Tramex). The substrate needs to be visibly dry and have adequate pull-off strength min 1.5 N/mm². Check for rising moisture.

MAINTENANCE

CLEANING

Please refer to the Sikafloor® Cleaning Regime

FURTHER INFORMATION

Substrate quality & Preparation

Please refer to Sika Method Statement: “Evaluation and preparation of surfaces for flooring systems”.

Application instructions

Please refer to Sika Method Statement: “Mixing & Application of flooring systems”.

Maintenance

Please refer to “Sikafloor® Cleaning regime”.

IMPORTANT CONSIDERATIONS

- Freshly applied Sikafloor® products must be protected from damp, condensation and water for at least 24 hours.
- Uncured material reacts in contact with water (foaming).
- During application care must be taken that no sweat drops into fresh Sikafloor® products (wear head and wrist bands).
- For exact color matching, ensure the Sikafloor® product in each area is applied from the same control batch number.
- Under certain conditions, underfloor heating or high ambient temperatures combined with high point loading, may lead to imprints in the resin.
- If heating is required do not use gas, oil, paraffin or other fossil fuel heaters, these produce large quantities of both CO₂ and H₂O water vapour, which may adversely affect the finish. For heating use only electric powered warm air blower systems.

BASIS OF PRODUCT DATA

All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

LOCAL RESTRICTIONS

Please note that as a result of specific local regulations the declared data for this product may vary from country to country. Please consult the local Product Data Sheet for the exact product data.

ECOLOGY, HEALTH AND SAFETY

For information and advice on the safe handling, storage and disposal of chemical products, users shall refer to the most recent Safety Data Sheet (SDS) containing physical, ecological, toxicological and other safety-related data.

LEGAL NOTES

The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika’s current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika’s recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product’s suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must
be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
