DuPont™ Corian® Charging Surface

POWER UP SMART DEVICES
AT HOME, WIRELESSLY.

Corian.

CHARGING SURFACE

On the outside, this is our signature, stylish Corian® solid surface. What makes this unique is what's underneath.

Hidden from view is a transmitter that powers up smartphones, tablets and more, wirelessly.

Diagram illustrates placement of Individual Charging Unit.

Here's how to wirelessly charge smart devices in your business:

- 1** Select a Corian® surface colour from the hues and patterns available.
- 2** Decide where in your designs, a charging surface(s) will work best.
- 3** A DuPont™ Corian® fabricator* will install the device(s) along with the surface installation.
- 4** Once installed, customers can connect a Powermat® wireless charging ring or an enabled charging case, to a smart device.** Customers can then simply place the device on the charging spot and power up begins automatically. Charging stops when the battery is full.

It's that simple!

Visit casf.com.au/CorianPowerUp for more info.

*An authorized Corian® fabricator/installer has the needed expertise to install the Individual Wireless Charging unit underneath the surface. This requires the fabricator/installer to mill out an area on the underside of the surface to enable the induction process to occur.
**If a device is already Qi or PMA enabled, customers will not require a wireless charging ring or charging case to power up.
***Installation of the Powermat® unit requires third party support. For more information, contact CASF Australia.

There are two Corian® Charging Surface options:

The Individual Unit

A single charging unit that, once installed, is a plug and play system that works instantly for those who are ready to power up. With the ability to install one or a series of units for multiple users, the Individual unit creates a seamless solution for many applications.

The Powermat® Platform

For business settings, cloud-based technology offers the enhancement of full online connectivity for back-end management.

This option allows venues to offer a useful amenity and harness insightful data through a connected network. A dashboard shows unit utilization and customer length of stay. Remote diagnostic services and customer engagement tactics offer real-time capabilities.

Contact CASF Australia to learn more about the Powermat® unit.***
